

UTiFLEX® Flexible Cable Assemblies

INSULATION RESISTANCE

Carlisle Interconnect Technologies UTiFLEX cable assemblies have been evaluated for Insulation Resistance per MIL-STD-202F, Method 302, Test Condition B.

In keeping with the military standard, 500 volts +/- 10% were injected into the test sample for a minimum of two (2) minutes. The insulation resistance was read and recorded.

UTiFLEX assemblies exhibit insulation resistance greater than 100 x 105 MΩ/foot.
